LOGNOTE -- Chief, Operations Group, 7 February 1985

3. [] The office directors had a session with Danny Childs, the comptroller, recently. He is predicting very bleak budget years in FY-86 and 87. FY-87 will be especially tough, and new initiatives alone are running to over [] together with requests for [] positions. Childs says the Congressional decisions this year will be unusually political. He expects they will allow DOD an increase of inflation plus 3 percent (in other words an increase of 8 percent overall) and that this is probably what the Agency can expect. There is strong sentiment, however, to protect the forward motion of FBIS Modernization.

Lots of talk about FBIS and TV monitoring, but nothing the principals don't already know. DDS&T liked the memo on the "12 Cities" project. It's in DDI now.

As of 1 February everybody overseas will receive the 9.6 percent increase.

NPIC is looking for an EEO officer at GS-13 which they hope to get upgraded to GS-14 (NPIC has lots of EEO problems).

[] has been selected as Executive Officer at ORD.
